**W&O SUPPLY INTRODUCES SPACE PNEUMATIC ACTUATORS WITH
ABS TYPE APPROVAL FOR THE MARINE INDUSTRY**

JACKSONVILLE, Fla., November 29, 2006 - W&O Supply, the nation's largest supplier of marine valves, pipe, fittings, engineered products and valve automation systems, is proud to introduce two new models of its SPACE rack and pinion pneumatic actuators, the marine industry's most complete line of pneumatic actuators that are Type Approved by the American Bureau of Shipping (ABS) for use in marine applications.

The new SPACE Model SP and SPACE Model SPD pneumatic actuators are designed to operate valves that control the flow of water, fuel, oil and other fluids in shipboard, offshore platform and other marine applications. The SPACE Model SPD actuator mounts directly onto Center Line butterfly valve configurations, while the SPACE Model SP directly mounts to all other valves. The SPACE Model SP pneumatic actuator comes with a double square output drive, while the Model SPD comes with a double D drive. Both models feature pinion bearings for high cycle life and a corrosion resistant hard anodized finish.

With the addition of the Model SP and Model SPD, there are now more than one hundred models comprising the SPACE actuator product line. SPACE actuators also are used as components in valve automation and control systems
